PHI200 -Introduction to Philosophy (3 credits) will be renamed “GENERAL PHILOSOPHY”.
PSY105 - Introduction to Psychology (3 credits) will be renamed “GENERAL PSYCHOLOGY”.
SOC105 - Introduction to Sociology (3 credits) will be renamed “GENERAL SOCIOLOGY”.
The description for the abovementioned courses can be found on pg.87 of ASA College Catalog vol.27, chapter Course Descriptions.

**PHI110 @ 3 CREDITS**
GENERAL ETHICS
In this course, students will examine moral belief systems, including different theories of ethics and their application to moral issues in the society at large and in daily New York City life. Students will examine major ethical questions, including “What is morality?” and “What does God have to do with right and wrong?” Students will present ethical ideas of philosophers like Immanuel Kant and Jean-Paul Sartre to the class. Students will also be required to investigate and write about their own ethical values and to write critically about the application of ethics to life.

**PHI200 @ 3 CREDITS**
GENERAL PHILOSOPHY
This course surveys the canon of philosophical thought which presently defines the field. Students will explore the development of philosophy from a historically based collection of thinkers starting with Plato and working through to Sartre. All philosophy stems from fundamental questions. Throughout this course, the student will be examining basic assumptions, revising received views and looking in depth at the work of philosophers who at times took immense risks to do just this. By examining the original works of the philosophers themselves, students will explore first-hand the various modes of thought that brought civilization from Socratic rhetoric to the theories of Existentialism. This course seeks to define what we understand today to be philosophic inquiry.

**PSY105 @ 3 CREDITS**
GENERAL PSYCHOLOGY
This course covers the major facts, theories, and controversies of contemporary psychology from a natural science perspective. Topics include Freud and psychoanalysis, genetics and behavior, neural bases of behavior, motivation, emotion, sensation, perception, intelligence, and mental disorders and their treatment.

**SOC105 @ 3 CREDITS**
GENERAL SOCIOLOGY
This course introduces students to the study of human behavior in society. Students will examine major components of sociology, including culture, diversity, and such social institutions as family, government, and education. Students will be required to investigate and write about their own social values and to write critically about society in general.

** Courses marked by two asterisks are designated as General Education or Liberal Arts
