COURSE DESCRIPTIONS

Beginning Fall 2016 Semester, Chemistry (3 Credits) - CHE 105 will be offered as elective Arts and Sciences course.

CHE105

3 CREDITS

CHEMISTRY

This course explores the nature of matter and energy throughout diverse physical environments. The course will cover gases, the Ideal Gas Law, measurements and chemical calculations, chemical changes and reactions, atomic theory and chemical bonding, biochemistry, organic chemistry and nuclear chemistry. At the end of the course the students should be able to explain how physical events occur in terms of basic chemistry as they apply to the health sciences.
