COURSE DESCRIPTIONS - DIVISION OF HEALTH DISCIPLINES

BIO200 **3 CREDITS**

CLINICAL PATHOLOGY I

Clinical Pathology I is a systemic pathology course that examines the major diseases affecting joints, skeletal muscles and skin, the cardiovascular systems, blood and the central nervous system. The etiology, pathogenesis, and clinical features of the various disorders are emphasized, as well as their relevance in massage therapy.

BIO220 **3 CREDITS**

CLINICAL PATHOLOGY II

Clinical Pathology II continues the in-depth look at disease processes of the human body. Students continue their examination of the major diseases affecting respiratory, digestive, urinary, reproductive, and endocrine systems. The etiology, pathogenesis, and clinical features of the various disorders are emphasized, as well as their relevance in massage therapy.

Prerequisite: BIO200.
