Beginning June 17, 2014 (Summer 2014 Semester) the following new ELECTIVE ARTS AND SCIENCE COURSE will be introduced in Associate Degree programs which have Elective Arts and Science courses selection:

**SCI101**  
**INTEGRATED SCIENCES**  
3 CREDITS

The Integrated Sciences course introduces the student to notable science components particularly physics, chemistry, astronomy, geology, and biology. Classroom instruction will be anchored largely on the interdisciplinary approach. The course will progress using contextual integration of the social, historical, as well as philosophical inquiry and problem-solving methods of the learning delivery system. Such will provide the student with critical thinking and inquiry skills essential toward further studies in the health disciplines.

*Prerequisites: None*
