CIS010 3 NON-CREDIT
INTRODUCTION TO COMPUTERS
This course introduces basics to computers and its applications. Students will learn concepts of computing as well as gain day-to-day computing skills using popular Microsoft Office Applications (MS Word, MS Excel, MS PowerPoint). This course prepares the students to be eligible to attend Computer Concepts and Applications CIS100 course.

Prerequisite: Computer Skills Placement (CSP) Test

CIS100 3 CREDITS
COMPUTER CONCEPTS AND APPLICATIONS
This course introduces computational technology and its applications. It provides a comprehensive overview of various operating systems, social and ethical issues and information security. The course provides elementary levels of coding, algorithms and stages of AI. Students will also become proficient in Microsoft Office applications.

Prerequisite: CIS010
